BACKUP AND DISASTER RECOVERY

When did you last test a restore?

A backup nobody has restored is a guess. Pinnacle builds immutable, off-site backup for your servers and Microsoft 365, then proves it works with scheduled restore tests.

Four questions to ask today

Is a copy off-site?
Ransomware goes after local backups first.

Can it be deleted?
Immutable copies cannot be changed or erased.

How long to recover?
Know your recovery time before you need it.

Who checks it?
Daily job alerts reviewed by a person.

What Pinnacle backup includes

- **Server backup** with local and cloud copies.
- **Microsoft 365 backup** for mail, OneDrive, SharePoint and Teams.
- **Scheduled restore tests** with written results.
- **Immutable cloud retention** an attacker cannot delete.
- **Daily monitoring,** with failed jobs worked by our team.
- **Fast recovery:** run a failed server from backup while it is repaired.

Then we plan for the bad day

Professional services

- Disaster recovery plan and runbook
- Recovery time goals set with your leadership
- Tabletop exercise with your team
- Ransomware recovery support
- Dell backup storage sized and installed

For insurance and compliance

- Proof of tested restores for your carrier
- Offline or immutable copy requirements met
- HIPAA and FTC Safeguards backup controls
- Quarterly backup status reports
- Evidence tracked in Compliance Scorecard
