Pinnacle Computer Services
SOLUTIONS FOR BUSINESS

IT CONTINUITY · YOUR INSURANCE POLICY

What happens if your IT person leaves tomorrow?

People quit, retire or take a better offer. Providers get bought or close. If one person holds all your passwords and know-how, you are one resignation away from trouble. Pinnacle is your insurance policy.

Who could leave you high and dry

Your IT employee
Quits, retires or wins the lottery

Your IT guy
Part-time, busy or moving on

Your IT provider
Acquired, consolidated or closed

Your nephew
He meant well, but he is at college now

What the policy covers

- **Documentation** of your network, servers, accounts and vendors.
- **Admin access** owned by your business, with Pinnacle as backup.
- **A full team in Evansville** ready to step in on short notice.
- **Passwords secured** in a managed vault, not one person's notebook.
- **Backups and monitoring** checked, so you know they actually work.
- **No long gap** while you hire a replacement.

How it works

1 Document
We map your systems and collect the keys.

2 Verify
Backups, licenses and admin accounts confirmed.

3 Stand by
A yearly review keeps it all current.

4 Step in
If someone leaves, we take over right away.

Buy coverage before you need it.
Taking over an undocumented network after someone walks out costs far more than keeping the keys on file.
