Pinnacle Computer Services
SOLUTIONS FOR BUSINESS

paloalto NETWORKS

Meet the New PA-500 Series.

Enterprise-grade security for the small office and the distributed branch.

PA-540

Palo Alto's newest branch firewalls bring the same application, user and content visibility you trust to the edge of your network, with more speed, more ports and simpler deployment. If your branch firewall is a few years old, this is the upgrade.

2X
Performance
Up to twice the performance of the PA-400 Series.

24
Ports
Flexible connectivity with up to 24 ports.

PoE
Power + Network
PoE models power phones, access points and cameras over one cable.

ZTP
Zero Touch
Zero Touch Provisioning with Strata Cloud Manager.

Also: 5G model available · Active/passive and active/active HA · Dual power adapter support on most models · TPM key protection
Models: PA-501 · PA-505 · PA-510 · PA-520 · PA-520-5G · PA-540 · PA-545-POE · PA-550 · PA-555-POE · PA-560

Palo Alto Professional Services

Upgrading from a PA-220, PA-400, PA-800 or another vendor entirely? We take it from quote to cutover. Have your own IT team? We work alongside them on a project basis.
