Netwrix Auditor for Network Devices

Complete visibility into activity around your Cisco and Fortinet network devices

Netwrix Auditor for Network Devices provides **security intelligence** that enables you to quickly detect and investigate threats to your **perimeter security**, such as unauthorized changes to configurations, suspicious logon attempts and scanning threats. It also provides detailed information about hardware malfunctions and remote access to your network.

DETECT SECURITY THREATS

Enables you to spot and investigate improper configuration changes, suspicious logon attempts, scanning threats and more — before they lead to network security breaches or business disruptions.

PASS COMPLIANCE AUDITS WITH LESS EFFORT AND EXPENSE

Includes reports mapped to PCI DSS, FISMA/NIST, CJIS and other common compliance regulations. You can also create custom reports and quickly answer auditors' questions using the Interactive Search feature.

INCREASE THE PRODUCTIVITY OF YOUR IT TEAMS

Simplifies monitoring of activity around network devices, incident investigation and report creation, In addition, it automates report delivery to facilitate regular review.

CUSTOMER FEEDBACK

"I love the reports. It fulfills one of my DoD DFAR requirements to monitor remote access sessions. The log shows all VPN activity from my Cisco ASA's. Nice job, guys!"

Michael Nedbal, Chief Information Security Officer, Makai Ocean Engineering, Inc.

Key Features of Netwrix Auditor for Network Devices

VISIBILITY INTO LOGON EVENTS

Monitoring of successful and failed logons to your network devices, including VPN logons, enables you to spot suspicious activity in time to prevent security breaches.

CONTROL OVER CONFIGURATION CHANGES

Deep insight into changes to the configuration of your network devices helps you identify improper changes that weaken perimeter security and hold individuals accountable for their actions.

HARDWARE MONITORING

Visibility into hardware issues helps you identify hardware malfunctions and quickly find the root cause so you can take appropriate steps to ensure stable network performance.

ALERTS ON CRITICAL EVENTS

Predefined and custom alerts enable prompt detection of unauthorized changes, suspicious logon attempts, scanning threats and hardware issues, before they turn into security breaches or lead to downtime.

INTERACTIVE SEARCH

You can quickly determine the root cause of an incident, such as the shutdown of a network device or an unauthorized password reset on a router. You can save your searches as custom reports for future use.

READY-TO-USE COMPLIANCE REPORTS

Predefined reports slash the time required for compliance preparation. You can quickly provide evidence to auditors that you know about every change to the configuration of your network devices and have control over logon sessions.

HOW IS NETWRIX AUDITOR FOR NETWORK DEVICES DIFFERENT?

UNIFIED PLATFORM

Delivers single-pane-of-glass security monitoring for 13 systems and applications — both on-premises and cloud-based.

TWO-TIERED DATA STORAGE

Keeps your entire audit trail for over 10 years in a reliable and cost-effective two-tiered (file-based + SQL database) storage and ensures easy access to it throughout the whole retention period.

RESTFUL API

Integrates with other security, compliance and IT automation tools to expand visibility to other systems and enhance your security posture.
