Netwrix Auditor for Azure AD

Complete visibility into what's happening in your Microsoft Azure Active Directory

Netwrix Auditor for Azure AD **maximizes visibility** into user actions in your cloud-based Active Directory. It provides **security analytics** that enable you to quickly detect and investigate incidents that threaten your security or business continuity. This application delivers valuable insight into security and configuration changes, and enables Azure AD access control by reporting on both successful and failed sign-ins to your cloud directory service.

DETECT INSIDER THREATS

Netwrix Auditor for Azure AD delivers visibility into security and configuration changes in Azure AD, privilege escalation, anomalous administrator activity, suspicious user sign-in attempts and more. This deep insight enables IT departments to more effectively detect information security incidents caused by insider actions.

PASS COMPLIANCE AUDITS WITH LESS EFFORT

Netwrix Auditor for Azure AD provides out-of-the-box reports aligned with many compliance regulations, such as FERPA, FISMA/NIST800-53, GLBA, HIPAA, ISO/IEC 27001, NERC CIP, PCI DSS, SOX and others. The Interactive Search feature helps you generate custom reports and quickly answer auditors' questions.

INCREASE THE PRODUCTIVITY OF YOUR IT TEAMS

Netwrix Auditor for Azure AD enables administrators to quickly uncover the root causes of problems that affect your data security and business continuity. Furthermore, Netwrix Auditor for Azure AD automates change control and reporting tasks, which increases operational efficiency and quality.

CUSTOMER FEEDBACK

"Netwrix Auditor is a powerful solution when you need to get a high-level overview of what's happening across your IT systems, and it has exceeded my expectations. It gives us necessary information instantly when our admins make an unauthorized change. That means we can take proactive steps to prevent a significant negative impact on the overall security and make sure that no sensitive data is compromised."

John Cantarella, Network Manager, Clairvaux MacKillop College

Key Features of Netwrix Auditor for Azure AD

LOGON AUDITING

Continuous reporting on both successful and failed user sign-ins in Azure AD with full details, including client name and client IP address, enables you to validate your access controls, and comply with the requirements of many security standards, laws and regulations.

INTERACTIVE SEARCH

Google-like, interactive data search provides the flexibility needed to speed your security or compliance investigations. Simply supply your unique search criteria and quickly retrieve a particular audit trail record you need or establish the broader context of an incident with traces from across multiple IT systems.

VALUABLE INSIGHTS ABOUT USER ACTIONS

Detailed information on changes to Azure AD groups, users, passwords, roles, applications, service principals, devices, contacts, and more, helps you quickly spot and respond to user actions that may put your environment at risk. The actionable intelligence the reports provide enables you to establish full accountability of your privileged Azure AD users.

ADVANCED REPORTING CAPABILITIES

Monitor your AD's pulse and review important security metrics using predefined reports and Overview dashboards that deliver important details, such as what exactly changed, who made each change, where each change originated and when it happened, in easy-to-read format. Subscriptions automate report delivery to email addresses or shared folders, according to the schedule you define.

HOW IS NETWRIX AUDITOR FOR AZURE AD DIFFERENT?

TWO-TIERED DATA STORAGE

Offers an exceptionally reliable and cost-effective two-tiered (SQL database + file-based) storage system that keeps a complete audit trail for more than 10 years, and ensures easy access to it throughout the whole retention period.

RESTFUL API

Integrates with third-party or your own custom-built applications to expand visibility into your operations, improve security of data and facilitate IT workflows, such as change management, service desk or threat detection.

QUICK AND SIMPLE TO SET UP

Netwrix Auditor is easy to install and configure; no professional services required.
