Netwrix Auditor for Office 365

Complete visibility into what's happening in your Microsoft Office 365

Netwrix Auditor for Office 365 **maximizes visibility** into user actions in both SharePoint Online and the hosted Exchange component of Microsoft Office 365. It provides **security analytics** that enable you to quickly detect and investigate incidents that threaten the security of your sensitive content and user mailboxes or your business continuity. This application delivers deep insight into configuration, security and content changes, as well as data access, across all your SharePoint Online farms. It also tracks and reports on changes made to your Exchange Online organization and helps you establish control over non-owner mailbox access.

DETECT INSIDER THREATS

Netwrix Auditor for Office 365 delivers visibility into changes to SharePoint Online and Exchange Online security, configuration and content; suspicious access to SharePoint Online lists and documents; and non-owner access to Exchange Online user mailboxes. This deep insight enables IT departments to more effectively detect and mitigate insider threats.

PASS COMPLIANCE AUDITS WITH LESS EFFORT

Netwrix Auditor for Office 365 provides out-of-the-box reports aligned with the requirements of many compliance regulations, such as FERPA, FISMA/NIST800-53, GLBA, HIPAA, ISO/IEC 27001, NERC CIP, PCI DSS and SOX. The Interactive Search feature helps IT staff easily create custom reports and quickly answer auditors' questions.

INCREASE THE PRODUCTIVITY OF YOUR IT TEAMS

Netwrix Auditor for Office 365 enables system administrators to quickly uncover and investigate issues that can adversely impact business continuity or the security of sensitive information. In addition, the solution facilitates change control and automates reporting tasks, which further increases operational efficiency and quality.

CUSTOMER FEEDBACK

"The major benefit I see is that, with Netwrix Auditor, we gain a deep insight into our IT infrastructure that we didn't have before. The product adds a layer of security and accountability within the company. It is priceless for our customers who rely on Xcentric to guarantee the integrity of sensitive data."

Sam Hollis, Lead Infrastructure Engineer, Xcentric

Key Features of Netwrix Auditor for Office 365

ADVANCED REPORTING CAPABILITIES

Easy-to-read reports and overview dashboards deliver actionable intelligence about changes in your cloud-based SharePoint and Exchange deployments, helping you keep your Office 365 environment secure. Advanced filtering, sorting and exporting options make your work with the audit data more efficient. Subscriptions automate report delivery to specific email addresses or shared folders according to the schedule you define.

INTERACTIVE SEARCH

Google-like, interactive data search provides the flexibility you need to quickly investigate a security incident, ascertain the source of an operational failure or provide answers to questions from auditors. Easily supply and refine your search criteria to quickly retrieve the particular audit trail record you need or establish the broader context of an incident using traces from multiple IT systems simultaneously.

HOW IS NETWRIX AUDITOR FOR OFFICE 365 DIFFERENT?

SECURE AND EFFICIENT LONG-TERM DATA STORAGE

An exceptionally reliable and cost-effective two-tiered (SQL database + file-based) storage system keeps a complete audit trail for more than 10 years, and ensures easy access to it throughout the whole retention period.

FULL CONTROL OVER NON-OWNER MAILBOX ACCESS

Detect Exchange Online mailbox access by someone other than the owner to prevent exposure of sensitive information to unauthorized use. Reports detail all non-owner activity, specifying exactly what actions were performed on which specific mailbox items, the client used and the computer's IP address.

VISIBILITY INTO SHAREPOINT ONLINE DATA ACCESS

Track down any improper user access to your organization's most sensitive content. Netwrix Auditor for Office 365 delivers detailed information on who accessed your SharePoint Online lists, and who viewed or downloaded documents from your SharePoint Online sites.

EASY INTEGRATION WITH OTHER APPLICATIONS

A RESTful API makes it easy to integrate Netwrix Auditor with third-party or custom applications to expand visibility into your operations, improve data security, and improve IT workflows such as change management, service desk and threat detection.

QUICK AND SIMPLE TO SET UP

Netwrix Auditor is easy to install and configure; no professional services are required.
